# Policy considerations for improving supply chain resilience in East Asia

- 1. Ensure the multilateral trading system well functioning**
  - Keep trade and investment policies open and fair (no punitive unilateral actions allowed)
  - Improve intra East Asia trade and investment and strengthen cooperation with partners ASEAN, ASEAN+1 FTAs, and the RCEP
- 2. Invest in logistic and maritime infrastructure**
  - Investment in developing, upgrading, modernizing, and decarbonizing ports, shipping and logistic infrastructures is key for enhancing SC resilience.

## 3. Invest in digital transformation

- Optimize the use of digital technology in supply chains; and facilitate firm's participation in digital and supply chains
  - ✓ to improve precision in supply and demand forecast and thus optimize inventory levels
  - ✓ to enhance transparency and traceability across supply chains
  - ✓ to improve accuracy in risk assessments
- Mobilize investment in physical and digital infrastructure

# Recent Trends in Global Supply Chain (SC)

- 
1. Diversify network of suppliers and partners to reduce dependency on single or a couple of suppliers and export destinations
  2. Different regions/countries pursue different ways in SC: from reshoring, near-shoring, to **some concerning trends** of friend-shoring and decoupling (recently renamed as de-risking). Firms switch from **just-in-time** to **just-in-case** supply chain model.
  3. Global rising protectionism measures: infant industry subsidies, export and import bans, local content requirements, etc.

# The Way Ahead...

*strengthening ASEAN national resilience*

## Domestic Disciplines

- Maintain Macroeconomic Stability. Improve competitiveness in the manufacturing sector. Optimize taxes and Implement ‘wise expenditure’ for inclusive growth.
- Dynamic disciplines in ensuring good regulatory practices for the best of the Indonesian Economy (improve transparency of Non-Tariff Measures, eliminate unnecessary Local Content Requirements, automatic export and import licensing)
- Invest in Digital Connectivity: improve hard and soft skills (Digital transformation is about people).

# The Way Ahead...

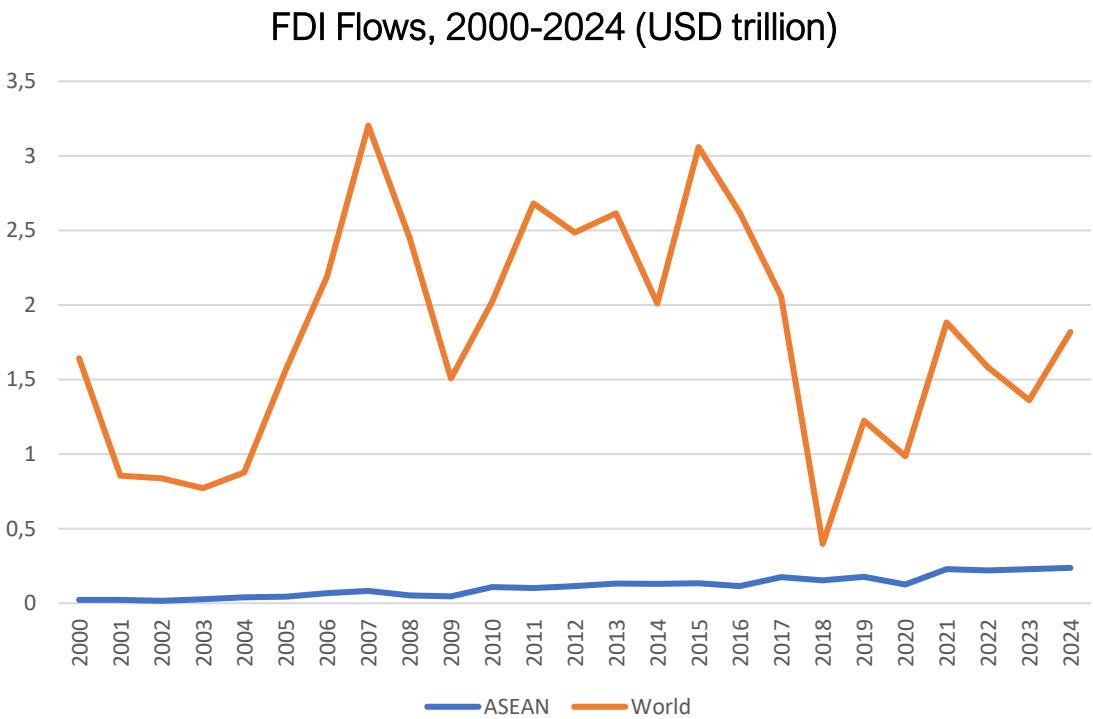

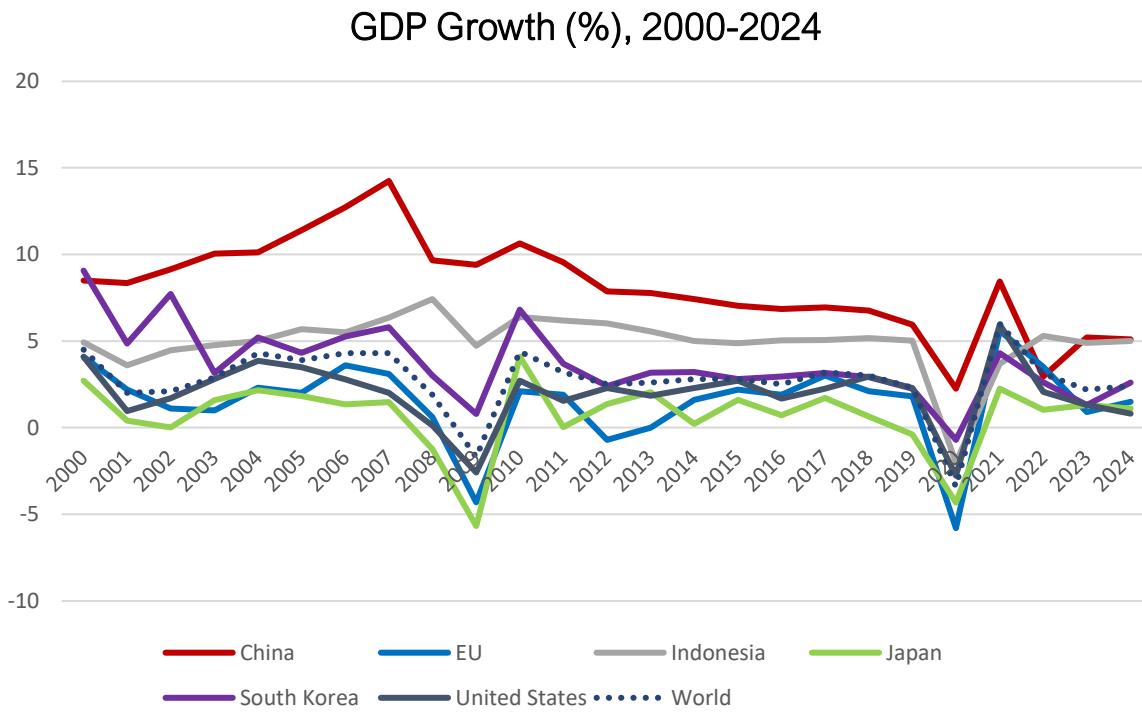

*leveraging new growth drivers, embracing a new global economic order*

## International Engagement

1. Ensure the multilateral trading system well functioning
  - Keep trade and investment policies open and fair (no punitive unilateral actions allowed)
  - Strengthen and ensure regional based cooperation are well implemented and fully optimized: ASEAN, ASEAN+1 FTAs, and the RCEP
2. Keep neutral position, keep engaging with the US and the West, China, and enhance engagement with middle powers. New sources of exports, imports, investment, and growth (not only countries, but sectors eg., Digital).
3. Embrace *New Global Economic Order* (eds. Lili Yan Ing and Dani Rodrik)
