d2_002_1	09D2-002-1	[Instructions for interviewer to read:] Thank you very much. We would like to measure in the following procedure. Here is a sphygmomanometer. Please let us measure three times using this equipment. Wrap the cuff around your left arm. Hold your palm upwards and relax your arm. Relax your stomach during the measurement. When you push the button, the cuff starts to expand and press your arm. Then cuff deflates gradually as the air comes out, and it measures your blood pressure automatically. Since checking the result may affect the blood pressure, I will tell you all the results after measuring three times. Did you understand the procedure?	1. Yes 2. No	2286	1.014	0.118	1	2	1	1	1	1	1

Responding to the results, the city (town/village) says that I can refer to the data in this survey if I can get your permission. This is priceless information for municipalities to plan medical and nursing care services. Would you permit us to access it?
