

The background image shows a woman from behind, holding a baby. She has dark hair with a blue clip and is wearing a white tank top with pink trim and a cartoon pattern. The baby is wearing a pink headband. They are in an outdoor setting, possibly a slum, with a green tarp and other people in the background. In the far background, a city skyline with tall buildings is visible under a hazy sky. An orange rectangular bar is located in the top left corner of the slide.

On SDGs Implementation in Indonesia

Agenda

- Context
- MDGs achievement: Unfinished business
- From HLPEP to Inter-governmental negotiation on Post-2015 DA
- SDGs in Indonesia: Implementation and progress
- Reflections

Indonesia: The context

- Population: 270 million
- GDP per capita \$4,196 (2019); \$4,038* (2020); \$4,287* (2021)
- Area: 1,9 million km² (land); 8.1 million km² (sea)
- 17.504 islands
- 34 ministries (4 coord. minst)
- 34 provinces; 532 cities/municipals; 6,994 sub-districts; 74,958 villages
- 9,655 primary healthcare

Indonesia's Macroeconomic Fundamentals Before and During COVID-19

Item	2018	2019	2020 (initial projection)	2020 (COVID-19)			
				Q1	Q2	Q3	Q4
GDP growth (%)	5.2	5.0	5.3	3.0	-5.3	-3.5	-2.1
Inflation (%) ^a	3.13	2.72	3.10	2.96	1.96	1.42	1.68
Unemployment (%)	5.3	5.3	4.8-5.1	5.0	5.2	7.1	7.1
Poverty rate (%)	9.82	9.41	8.5-9.0	9.78	9.78	10.34	10.2 (est.)
Gini index	0.389	0.382	0.375-0.380	0.381	0.380	0.382	0.381
Human Development Index	71.39	71.92	72.51	71.94			

COVID-19 = Coronavirus Disease 2019, GDP = gross domestic product, Q = quarter.

^a Inflation data for is from Statistics Indonesia; for 2020, ADB projects inflation to average 2.0%.

Millennium Development Goals 2000-2015

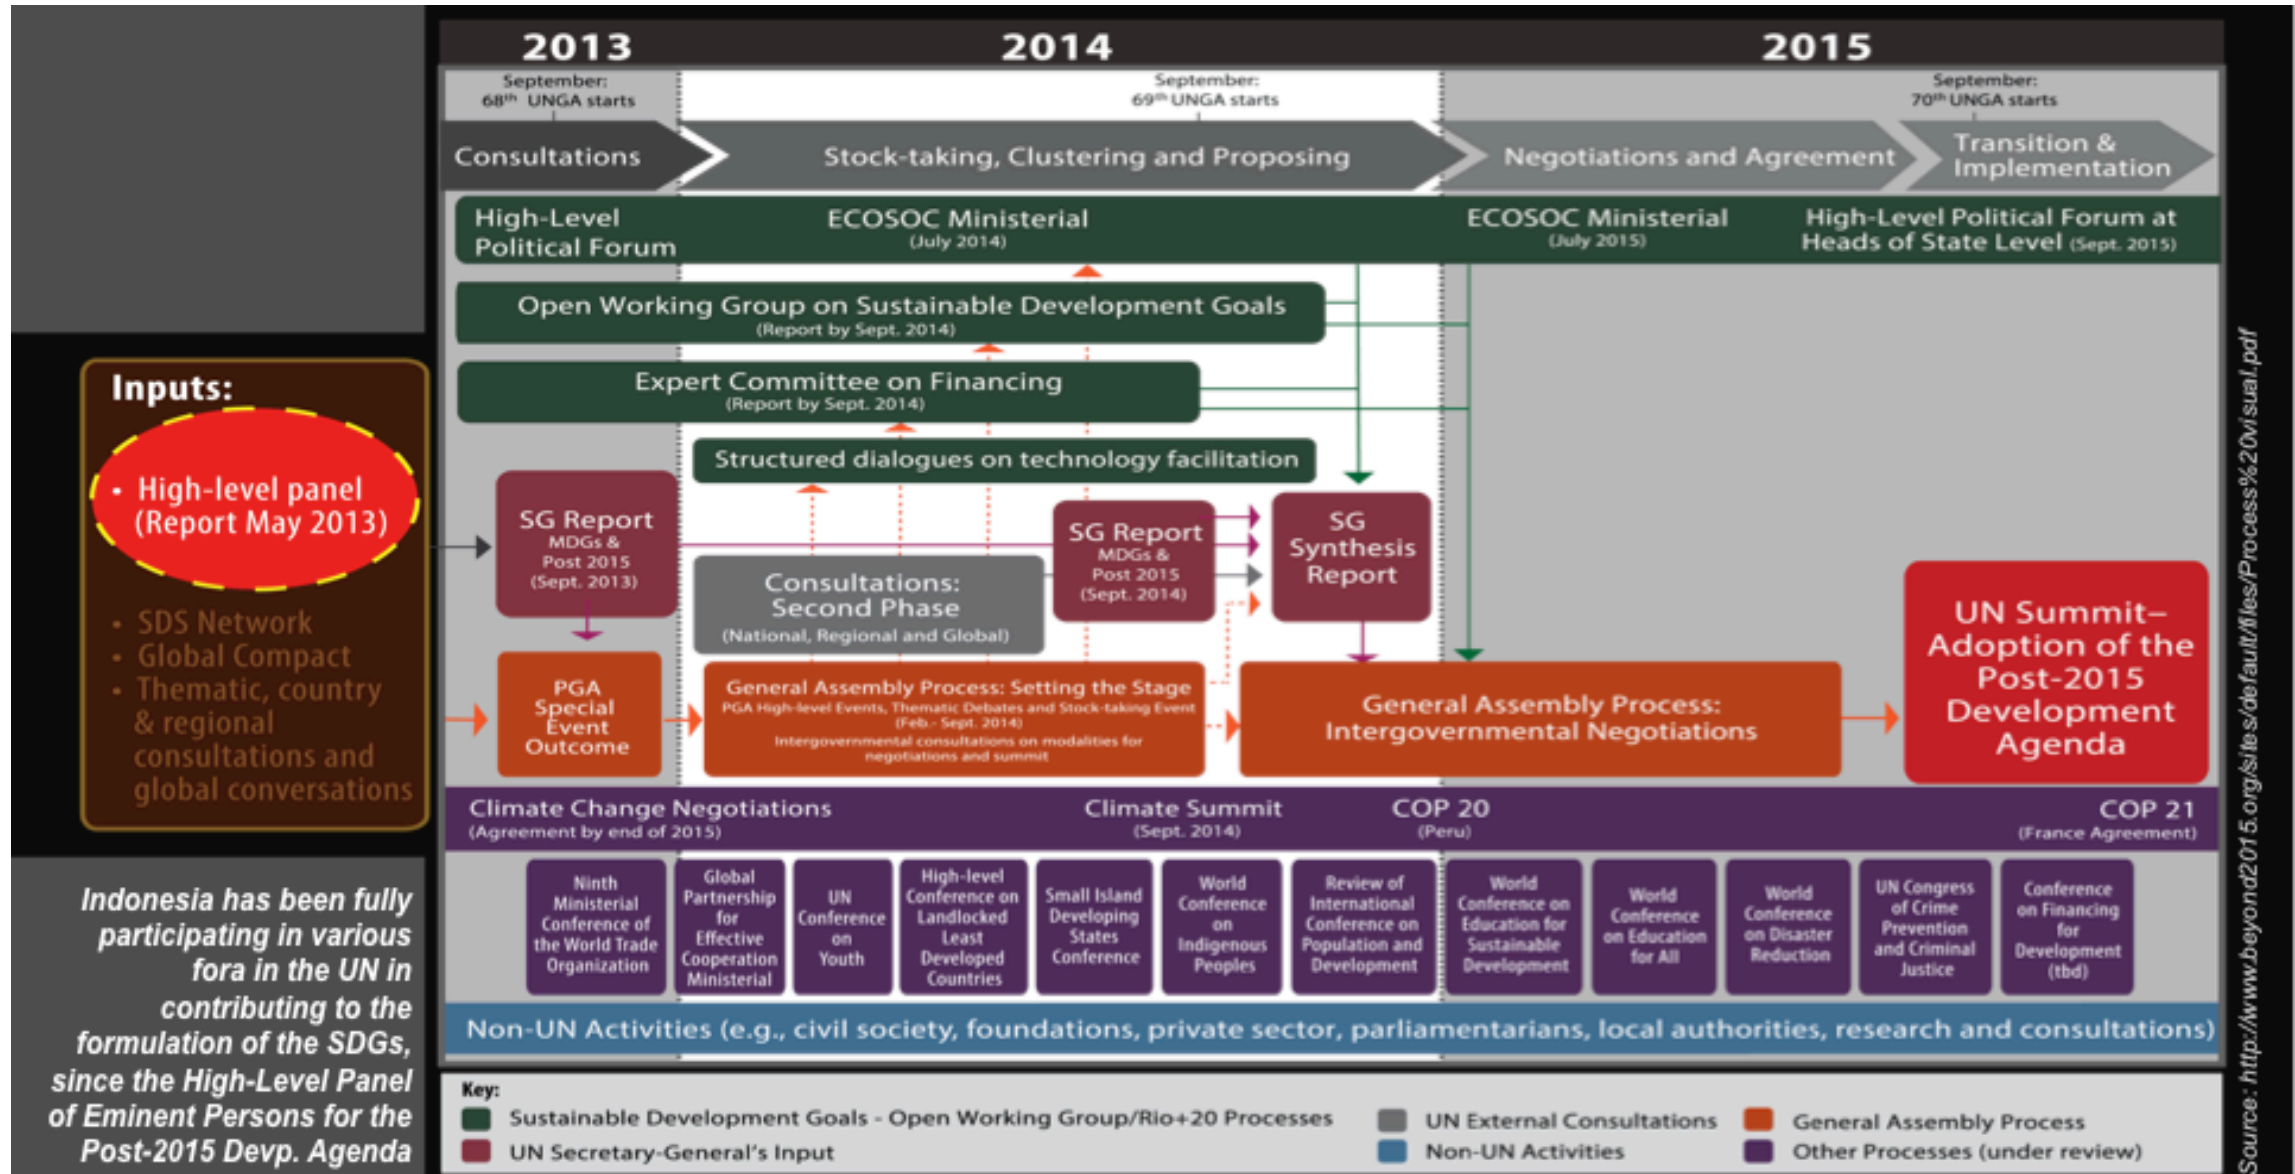

From MDGs to Post-2015 Development Agenda: The role of Indonesia

Co-chairmanship with the UK and Liberia in the High-Level Panel of Eminent Persons on the Post-2015 Development Agenda (HLPEP)

The Panel began its work in September 2012 and had held **consultations with more than 5,000 civil society groups from 121 countries across every region of the world** to produce the report. Panel members also spoke to experts from multilateral organisations, national governments, local authorities and the academic and scientific communities, as well as **250 companies** from the private sector.

From MDGs to Post-2015 Development Agenda: A complex process and policy at the global level

Post-2015 Development Agenda and SDGs Negotiation

Politics inside and outside the house

Transforming Our World: The 2030 Agenda for Sustainable Development (UN, 2015)

**Five Fundamental Dimensions
of Sustainable Development**

**Translated into 17 goals and 169 targets
as AGENDA 2030 SDGs**

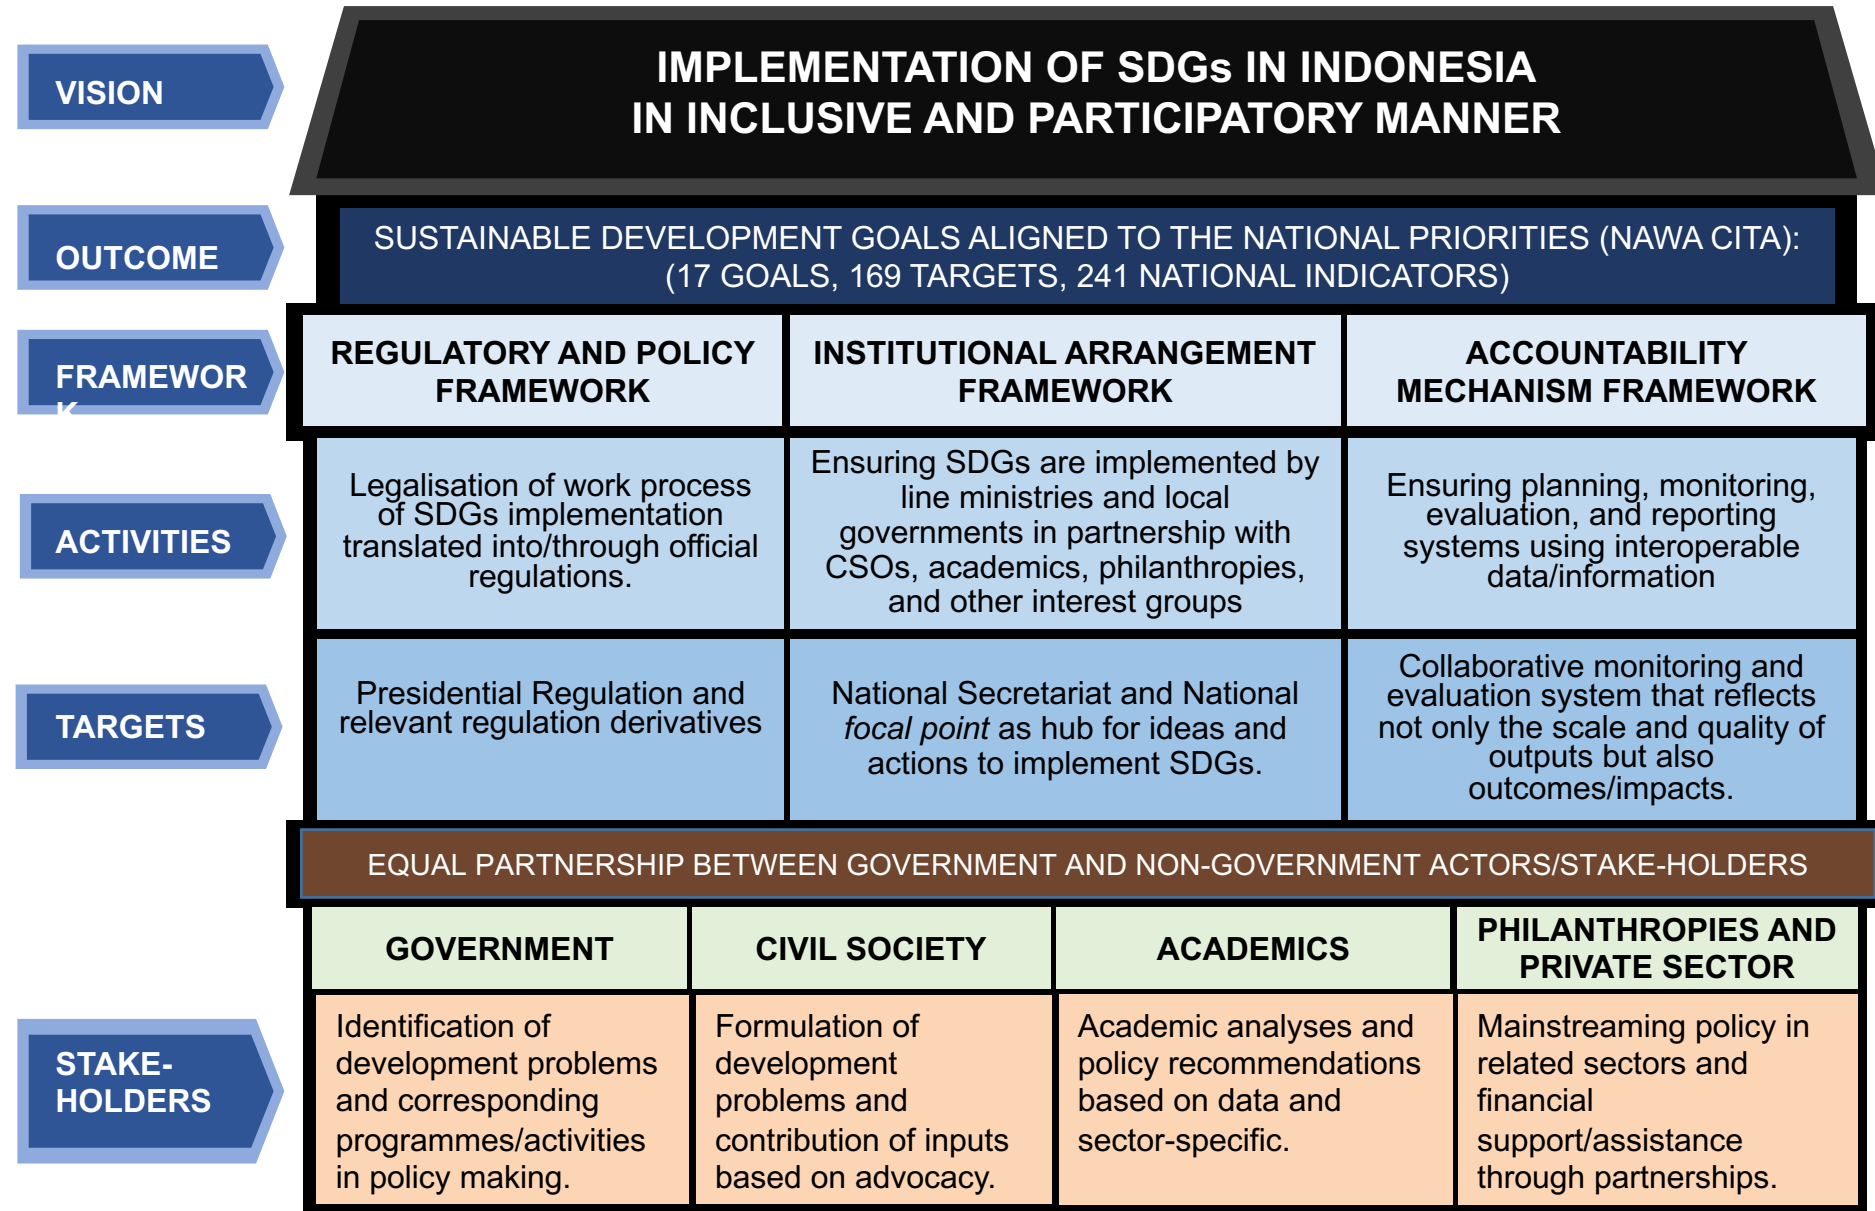

Does it align with Indonesia's National Development Agenda?

Alignment of SDGs and National Priorities

	1. To renew the state's obligation to protect all people and provide security to all citizens	Goal 17, 16, 10, 3
	1. The presence of the government through a clean, effective, democratic, and reliable governance,	All Goals
	2. To build Indonesia from its periphery; to strengthening the rural areas within the framework of a unitary state of Indonesia.	Goal 1-11
	3. To reject a weak state by reforming the system through corruption-free, dignified, and reliable law enforcement.	All Goals
	4. To improve the living quality of all citizens	Goal 4, 2, 3, 6
	5. To improve people's productivity and competitiveness in the international market	Goal 1-10
	6. To achieve economic independence by moving the strategic sectors to domestic economy.	Goal 1,2,3,4, 5,8,9,12
	7. To revolutionise the nation's character	Goal 3,4,11
	8. To strengthen diversity and social restoration of Indonesia	Goal 17, 16, 10, 5

SDGs Implementation Strategy

Voluntary National Reviews (VNR): How progress is measured and reported

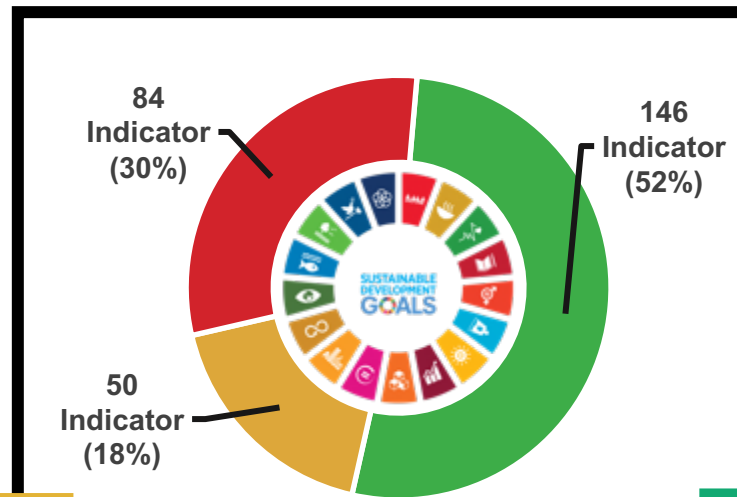

- More than 110 countries presented VNR (2016-2019) to HLPF (High-level Political Forum);
- HLPF central platform for follow-up and review SDGs with all member states, specialised agencies, and stakeholders;
- Supported by TFM (Technology Facilitation Mechanism) to enhance the effective use of STI (Science, Technology, and Innovation), i.e. technology needs and gaps.

For Indonesia:

- Implementing national development agenda is implementing SDGs;
- SDGs are institutionalised from the central to to subnational governments and integrated in national and subnational development planning;
- Massive and collaborative endeavour between government and non-state actors.

SDGs Achievement: 2019

Impact of COVID-19 to SDGs Attainment in Indonesia: Environment Dimension

6 CLEAN WATER AND SANITATION 	11 SUSTAINABLE CITIES AND COMMUNITIES 	12 RESPONSIBLE CONSUMPTION AND PRODUCTION 	13 CLIMATE ACTION 	14 LIFE BELOW WATER 	15 LIFE ON LAND 
<ul style="list-style-type: none">• The poor and the vulnerables who has limited access to water and sanitation have more risk of being infected by COVID-19	<ul style="list-style-type: none">• Settlement and housing programmes are halted.	<ul style="list-style-type: none">• Increase of unrecyclable household and medical waste	<ul style="list-style-type: none">• Reduce of commitment to climate action, which will have unfavourable impacts in the longer future	<ul style="list-style-type: none">• Maritime and fisheries sectors are badly affected due to the decrease in demand, problem in global supply-chain due to border closure, and reduced income of fishermen.	<ul style="list-style-type: none">• Deforestation creates many instances of zoonosis diseases.• Deforestation and land use conversion worsens natural disaster.

Impact of COVID-19 to SDGs Attainment in Indonesia: Legal and Governance Dimension

Case of Japan: Toyota

Achieve Zero CO₂ Emissions

New Vehicle Zero CO₂ Emissions Challenge

Challenge
CO₂ 0

Reduce global* average CO₂ emissions (TtW²) from new vehicles by 90 percent compared to Toyota's 2010 levels by 2050

Contribution to SDGs

Plant Zero CO₂ Emissions Challenge

Challenge
CO₂ 0

Achieve zero CO₂ emissions at global plants by 2050

Contribution to SDGs

Life Cycle Zero CO₂ Emissions Challenge

Challenge
CO₂ 0

Completely eliminate all CO₂ emissions throughout the entire vehicle life cycle

Contribution to SDGs

Achieve a net positive environmental impact

Challenge of Minimizing and Optimizing Water Usage

Challenge

Minimize water usage and implement water discharge management according to individual local conditions

Contribution to SDGs

Challenge of Establishing a Recycling-based Society and Systems

Challenge

Promote global deployment of End-of-life vehicle treatment and recycling technologies and systems developed in Japan

Contribution to SDGs

Challenge of Establishing a Future Society in Harmony with Nature

Challenge

Connect nature conservation activities beyond the Toyota Group and its business partners among communities, with the world, to the future

Contribution to SDGs

Founding spirit and technologies cultivated through manufacturing

- Respect for people, empowering various human resources
- Making safe, reasonably priced, high-quality cars
- Maintaining a stable business base

Toyota as a car company

First Japan-made passenger car

Developing safety technologies

Making "ever-better cars"

Developing environmental technologies

Transformation into a mobility company

- Building a future mobility society
- Addressing climate change and promoting the use of new energy sources
- Resilient and sustainable value chain

Electrification

Information/Connectivity

Intelligent/Automated Driving

Collaboration across industries

Advanced mobile services

Contributing to solving social issues

Through businesses

Improving value by adapting to CASE

Safe and reliable

Zero deaths and injuries from traffic accidents
Comfortable and congestion-free travels

Environment

No one lacking access to means of transportation
Spread of cars serving also as power sources

Use of hydrogen to promote energy diversification

TOYOTA ENVIRONMENTAL CHALLENGE 2050
Zero emissions (zero CO₂ emissions)
Recycling/reuse of resources

By social contribution activities

Aiming to become a reliable corporate citizen

Enhancing ESG

- Tackling human rights issues
- Promoting diversity

Waku-doki (heart-pumping excitement)

Fun and pleasure of sports and movement

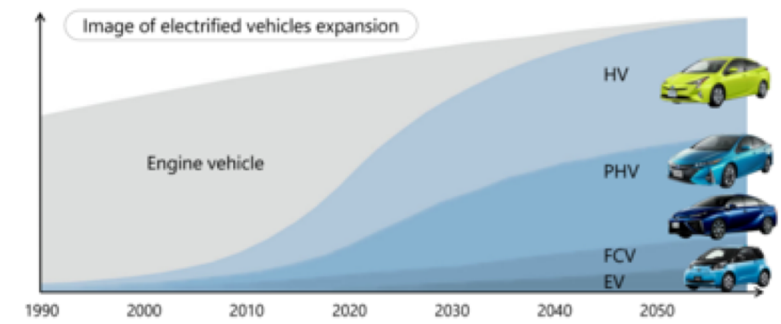

New Vehicle Zero CO₂ Emissions Challenge

Challenge

CO₂ 0

2030 Milestone

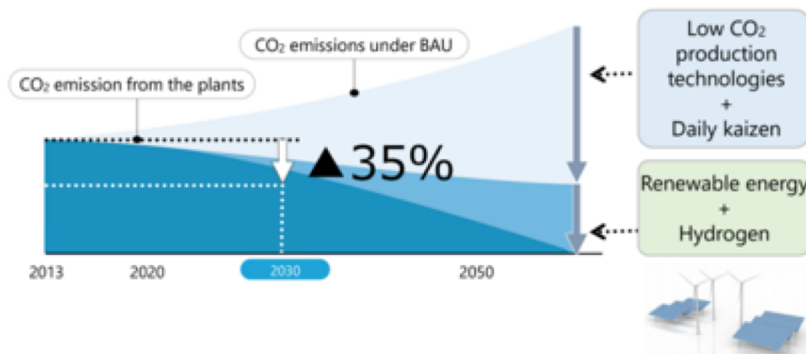

To achieve 90% reduction of global average CO₂ emissions in 2050, vehicle electrification is essential

Make annual global sales of more than 5.5 million electrified vehicles, including more than 1 million zero-emission vehicles (BEVs and FCEVs)

Outline of 2030 Milestone

Reducing CO₂ emission from the plants by 35% or more (compared to 2013)

Promoting CO₂ reduction by 'low CO₂ production technologies' + 'daily kaizen' and 'renewable energy + hydrogen'

Plant Zero CO₂ Emissions Challenge

Challenge

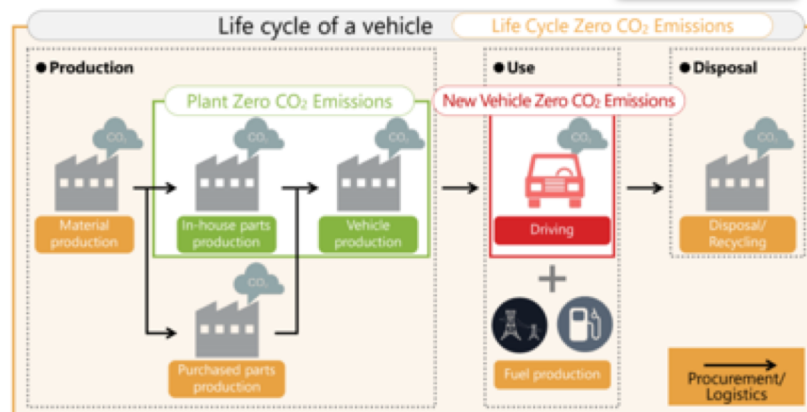

CO₂ 0

Life Cycle Zero CO₂ Emissions Challenge

Challenge

CO₂ 0

Scope of Life Cycle Zero CO₂ Emissions

Life Cycle Zero CO₂ Emissions Challenge by promoting activities for New Vehicle Zero CO₂ and Plant Zero CO₂, and with support from stakeholders

Challenge of Minimizing and Optimizing Water Usage

Challenge

Outline of 2030 Milestone

Minimizing impact on water environment

- Implement measures, on a priority basis, in the regions where the impact on its water environment is considered to be large

Water quantity

Completed measures at the four Challenge-focused plants in North America, Asia and Southern Africa

Water quality

Completed impact assessments and measures at all of the 22 plants where used water is discharged directly to river in North America, Asia and Europe

Europe

Asia

North America

Southern Africa

Maximizing communications

Disclose information appropriately and communicate actively with local communities and suppliers

Aiming for realizing minimization of impact on water environment through approaches that match local water situation

Challenge of Establishing a Recycling-based Society and Systems

Challenge

TOYOTA Global 100 Dismantlers Project

2030 Milestone

- Emerging countries
- Advanced countries

Appropriate treatment of waste oil, fluid, and CFC/HFC for prevention of water pollution, soil contamination, and global warming in the regions without appropriate infrastructures

Appropriate treatment of special parts and materials of next-generation vehicles

Li-ion battery

High-pressure hydrogen tank

Fuel-cell stack

Collection of CFC/HFC

Collection of waste oil and fluid

Set up 30 model facilities for appropriate treatment of end-of-life vehicles

Challenge of Establishing a Future Society in Harmony with Nature

Challenge

2030 Milestone

Challenge of Establishing a Future Society in Harmony with Nature

Project	2030 Milestone
Green Wave Project Harmony with nature for "Connecting communities"	<ul style="list-style-type: none"> Realize the "Plant in Harmony with Nature" - 12 in Japan and seven overseas - as well as implement harmony-with-nature activities in all regions where Toyota is based in collaboration with local communities and companies
Today for Tomorrow Project Environmental activities for "Connecting with the World"	<ul style="list-style-type: none"> Contribute to biodiversity conservation activities in collaboration with NGOs and others
ESD Project Environmental education for "Connecting to the Future"	<ul style="list-style-type: none"> Expand initiatives both in-house and outside to foster environmentally conscious persons responsible for the future

Promoting three 'Connecting' projects and contributing to biodiversity in various aspects

Signing of Record of Discussions on Technical Cooperation Project with Indonesia: Support for Strengthening SDG Implementation Framework

The Japan International Cooperation Agency (JICA) signed a Record of Discussions with the Government of the Republic of Indonesia (GOI) in Jakarta for the Project for Strengthening Framework of Implementation of Sustainable Development Goals (SDGs).*

The project aims to strengthen the GOI framework for SDG implementation by providing support for: (1) setting domestic indicators, (2) formulating action plans to achieve the indicators and (3) creating a monitoring and evaluation system.

As Indonesia has compiled data for only 36percent (85 out of 241) of the SDG indicators, data for the remaining indicators must be acquired. Moreover, action plans must be formulated or improved for establishing initiatives to achieve the SDGs indicators. Constructing a monitoring and evaluation system aligned with the action plans is also a priority.

In July 2017, the GOI announced a presidential decree pertaining to the SDGs that created a policy for strengthening the SDG implementation system, and anticipation for the outcome of the project has been growing at the National Development Planning Agency of Indonesia. In

Challenges and Opportunities: A reflection

- Remaining general challenges are **universal access, equal opportunity and treatment for all**. Strong concerns include: limited access to responsive public services, unequal quality education and economic opportunity, limited compliance of public services with national standards, as well as inadequate data and information.
- On **good governance**: corruption, lack of access to and quality of public information, and lack of inclusive data in policy making and implementation.
- On **disaster risks and climate change**: disaster preparedness, energy diversification, and efficient use of natural resources.
- On **domestic resource mobilisation**: more innovation is needed, particularly on tax compliance and administration.
- **COVID-19** has reset nearly all development outcomes – A fundamental change in development approach is needed

Way Forward

- **Recalibrating National Priorities and reallocating budget**
 - Strengthening human development through up-stream development policies (health, education, social protection)
 - Reducing regional disparities (through connectivity infrastructure)
 - Growth based on sustainable production, rather than mere consumption
 - Bridging digital divide – get the most remote connected and electrified
 - More focus on environmental and climate issues, and transition towards renewable energy –including disaster risk reduction
- Improving **state capacity** in delivering development outcomes
 - Creating necessary regulatory and policy framework
 - Setting institutional arrangement
 - Establishing accountability mechanism
 - Discipline implementation and thorough, evidence-based planning
 - Mobilisation of resources, both domestic and international

A photograph of a woman with dark hair tied back, wearing a light blue hair clip, holding a baby in her arms. The woman is wearing a white tank top with pink trim and a pattern of small pink flowers. The baby is wearing a pink shirt. In the background, there is a city skyline with several tall buildings, including a prominent one with a spire. The scene appears to be outdoors, possibly on a rooftop or a balcony, with a green tarp visible in the background.

Thank you
