

# New Energy and Industrial Technology Development Organization (NEDO)

## ◆ Activities :

1. Development & Introduction of New energy, Energy conservation and Environment technology
2. R&D on Industrial technology
3. International Cooperation

## ◆ Position :

Semi-governmental organization

# Topic 1

## Japan's Strategy for Achievement of GHG Emission Targets a 6% Reduction

|        |   |
|--------|---|
| 2.5%   | Reduction of CO <sub>2</sub> , methane and N <sub>2</sub> O emissions, etc. |
| 2.0%   | Technology innovation, nationwide efforts                                   |
| 0.5%   | Reduction of CO <sub>2</sub> , methane and N <sub>2</sub> O emissions, etc. |
| 3.7%   | Sinks, land use, land use change and forestry                               |
| + 2.0% | Reduction of CFC alternatives (HFC, PFC, SF <sub>6</sub> )                  |
| 1.8%   | JI (joint implementation), emissions trade                                  |

## Topic 2

# R&D of Recycling Technology

(Recycling of PET Bottle)
