# 1. Public perception (一般イメージ)

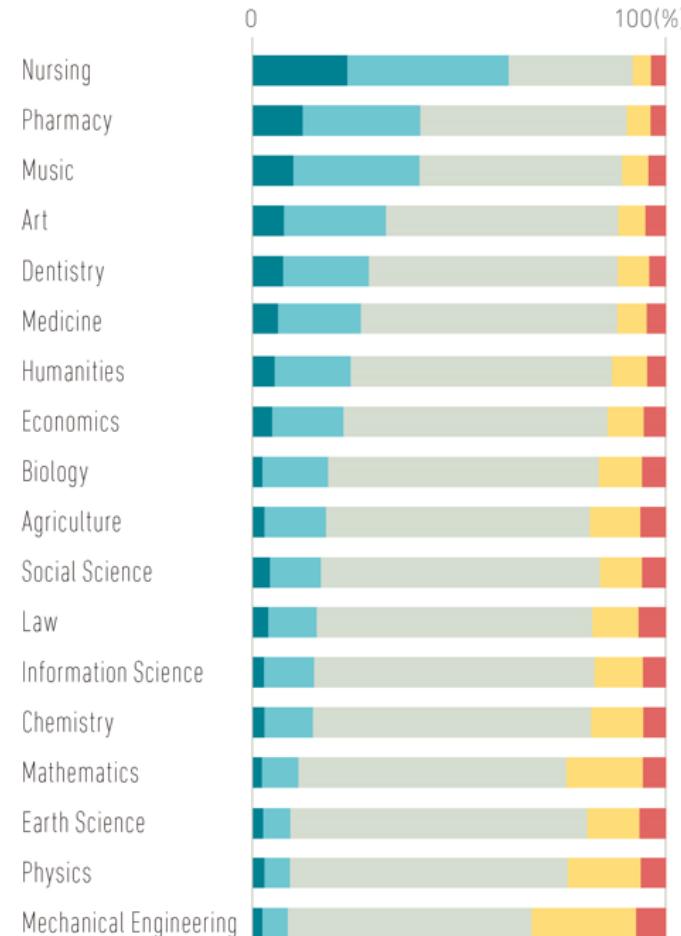

Ikkatai, Y., Minamizaki, A., Kano, K., Inoue, A., McKay, E., & Yokoyama, H. M. (2020). Gender-biased public perception of STEM fields, focusing on the influence of egalitarian attitudes toward gender roles. *Journal of Science Communication*, 19(1), A08.

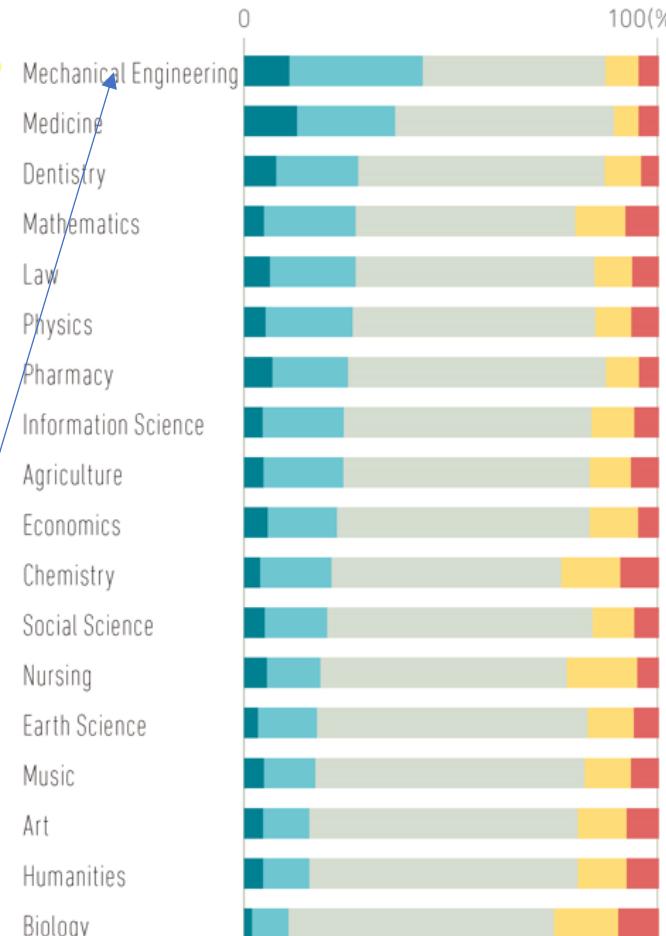

online survey 2019 in Japan  
1086 men and women aged 20-69  
541 men, 545 women  
Randomized by gender, age and region

Widely-held preconceptions that nursing is for women and mechanical engineering for men

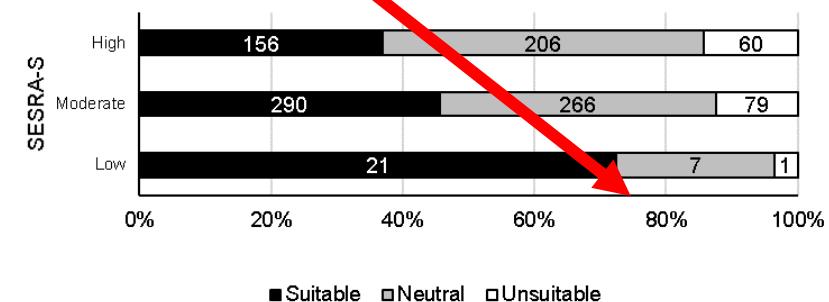

Do you think women are suited to this field?

Do you think men are suited to this field?

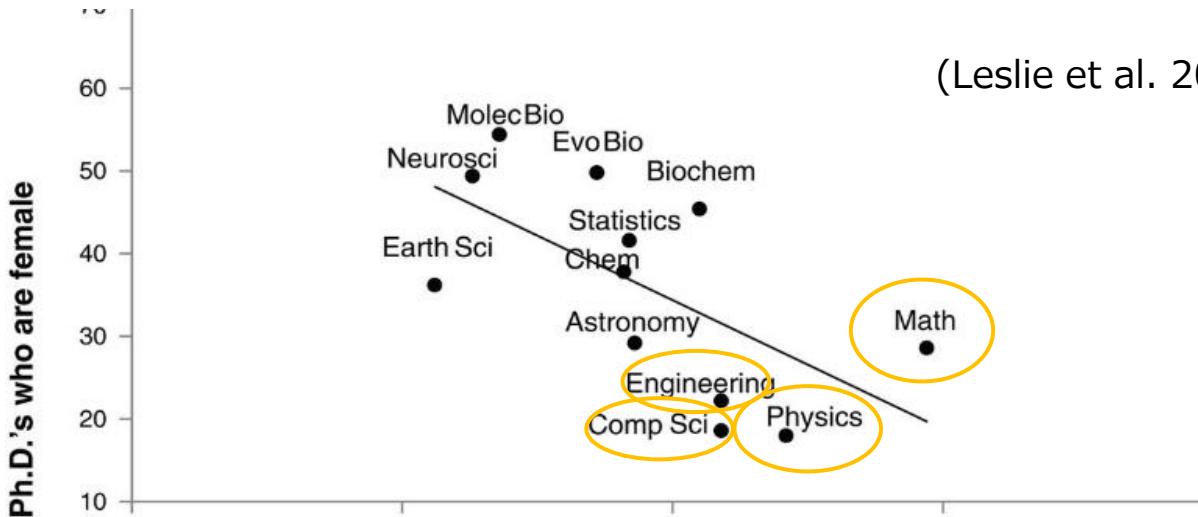

(b) Do you think men are suited to mechanical engineering?

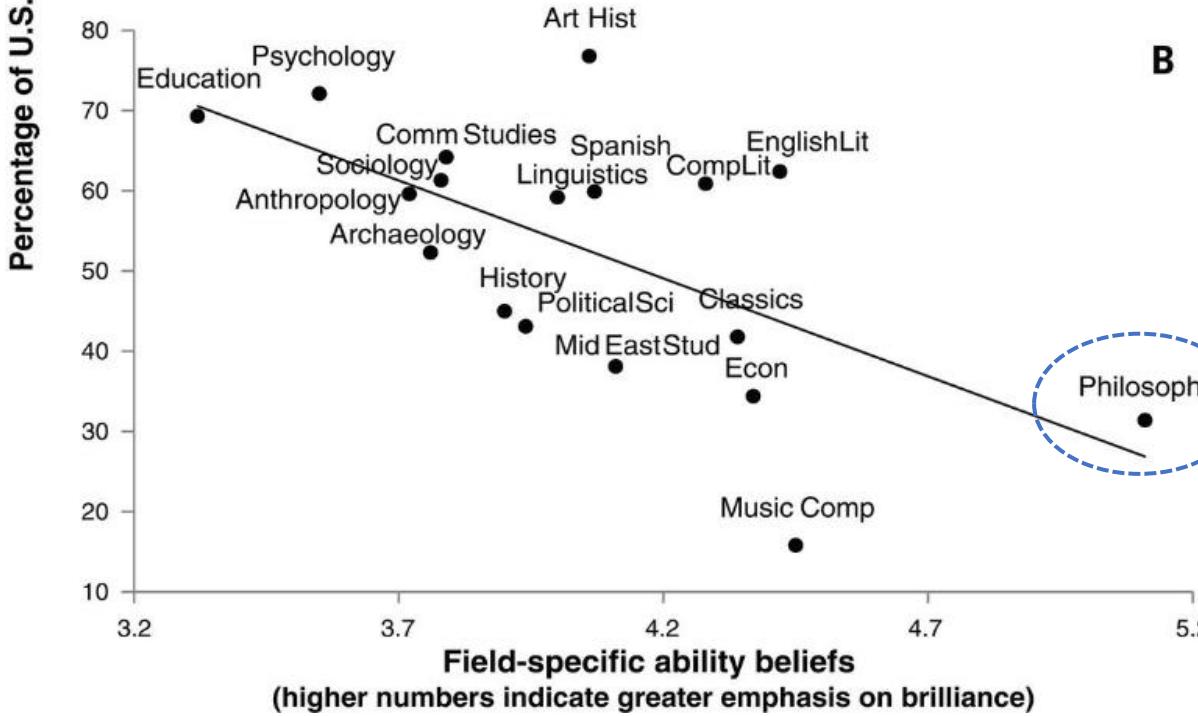

# Field – specific ability beliefs (Brilliance)

A

(Leslie et al. 2015)

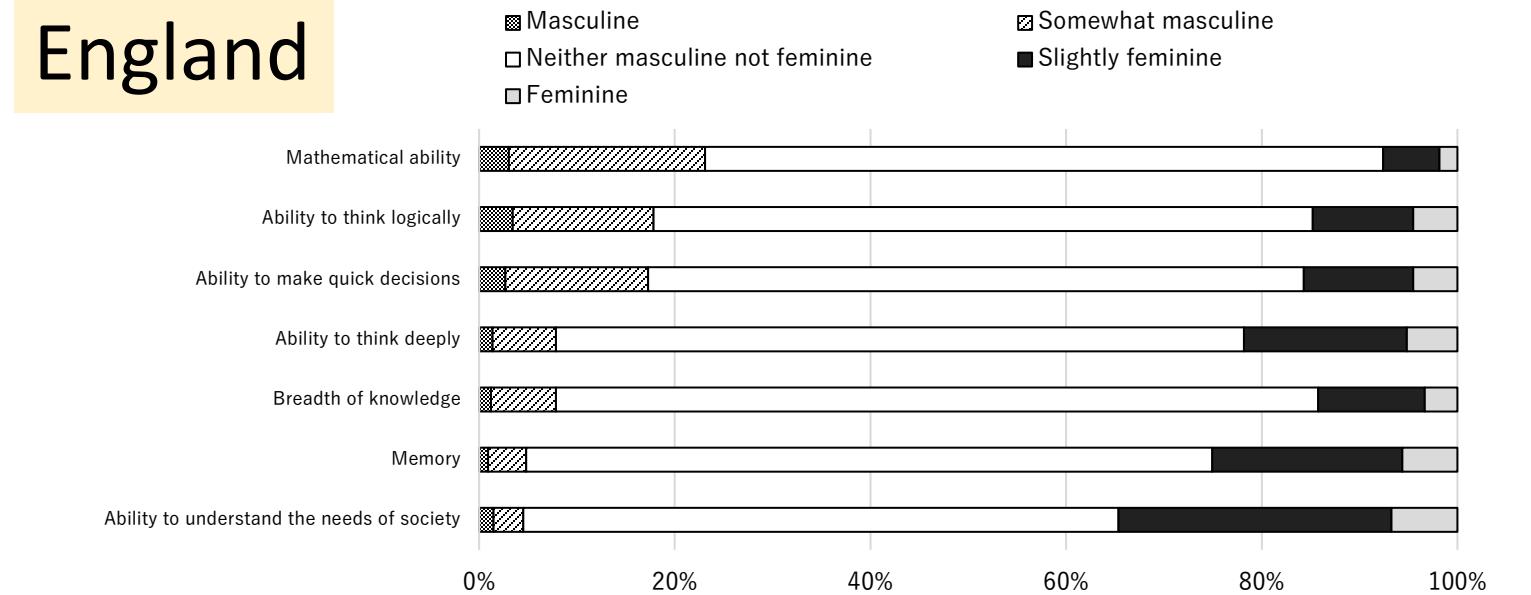

B

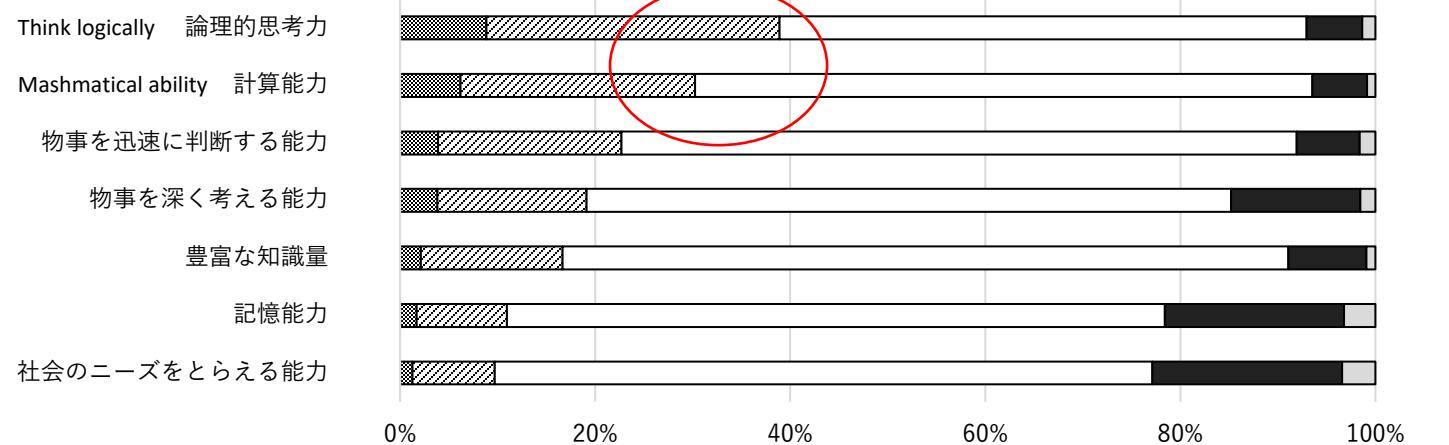

## 2. Ability stereotype (能力ステレオタイプ)

一方井祐子・井上敦・南崎梓・加納圭・マッカイユアン・横山広美 (2021) . STEM分野に必要とされる能力のジェンダーイメージ：日本とイギリスの比較研究. 科学技術社会論研究.  
(Ikkatai, Yuko, Atsushi Inoue, Azusa Minamizaki, Kei Kano, Euan McKay, Hiromi Yokoyama (2021). gender images of abilities needed in STEM fields: a comparative study of Japan and the United Kingdom. Journal of Science, Technology and Society.)

### England

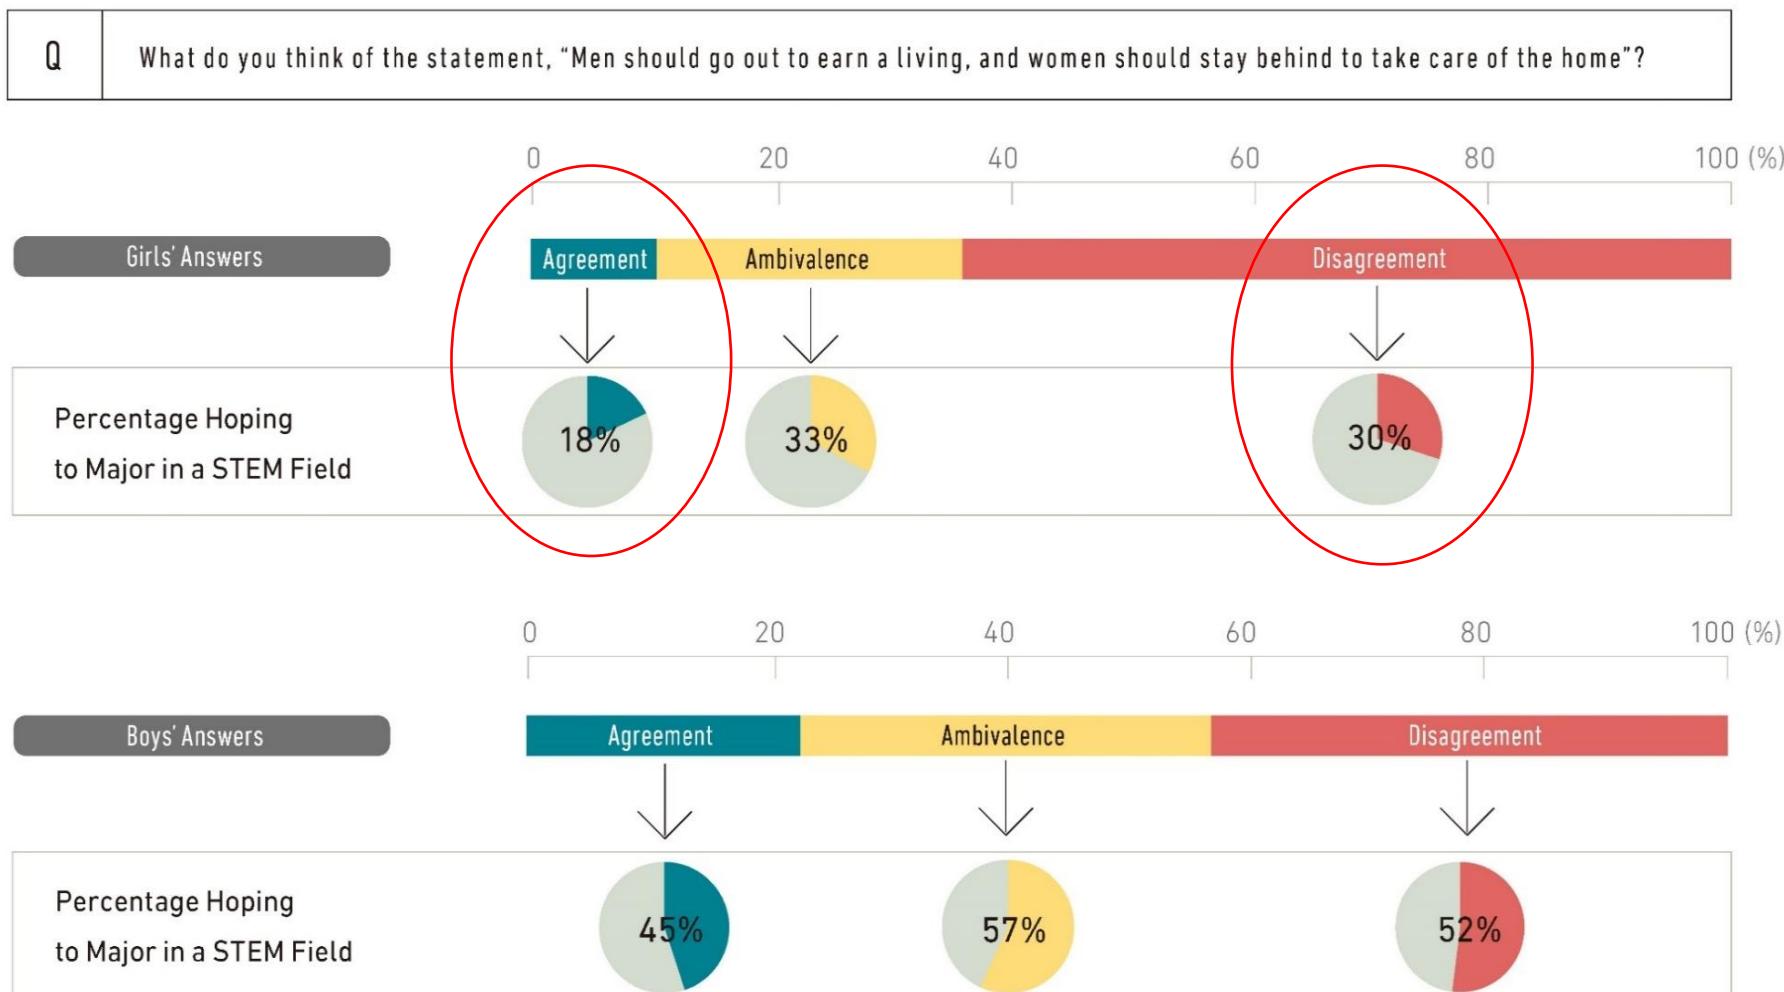

### Japan

Online Survey 2019  
1177 men and women aged 20-69  
583 males and 594 females  
Allocated by gender, age, and region

### 3. Girl's perception (女子生徒の視点)

井上敦・一方井祐子・南崎梓・加納圭・マッカイユアン・横山広美 (2021). 高校生のジェンダーステレオタイプと理系への進路希望, 科学技術社会論研究.(19) 64-78  
(Inoue, Atsushi, Yuko Ikkatai, Azusa Minamisaki, Kei Kano, Euan McKay, and Hiromi Yokoyama (2021). Gender stereotypes and career aspirations for science among high school students, Journal of Science, Technology and Society. (19) 64-78

## 4. Parents perception(親の視点)

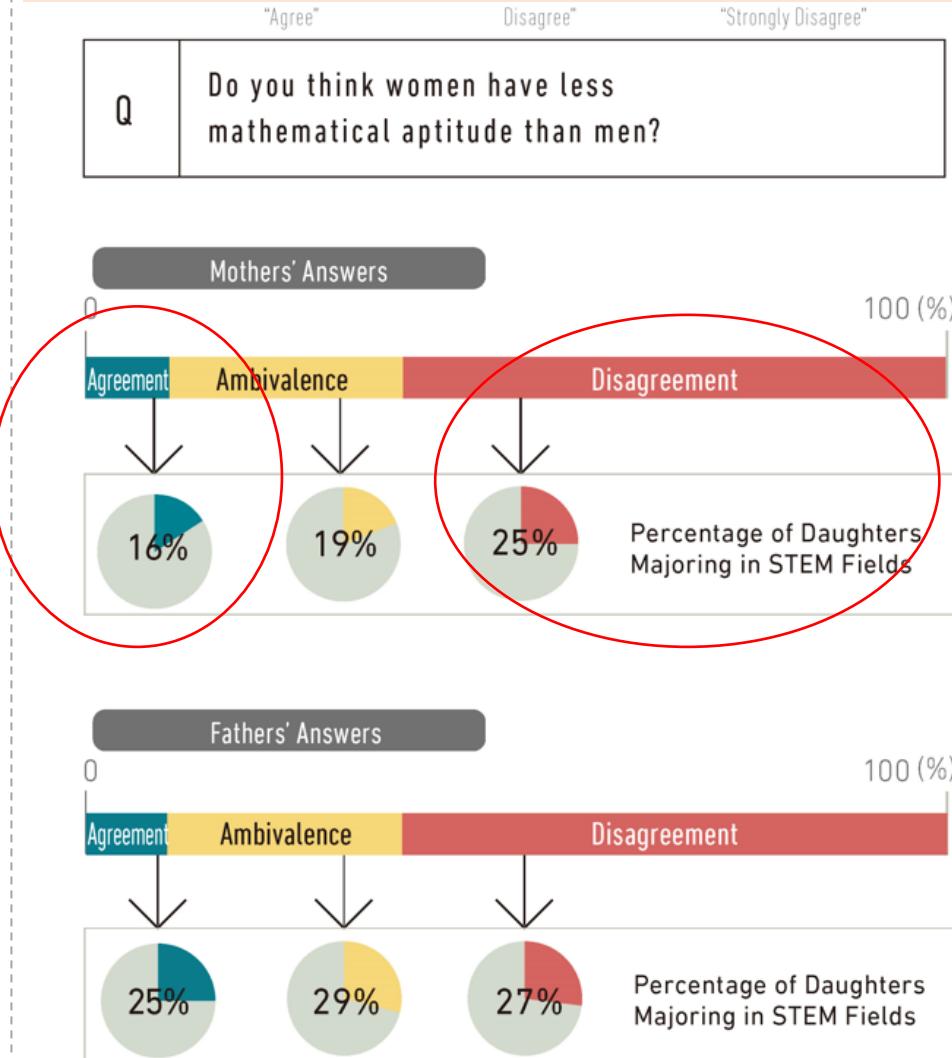

Ikkatai, Y., Inoue, A., Kano, K., Minamizaki, A., McKay, E., & Yokoyama, H. M. (2019). Parental egalitarian attitudes towards gender roles affect agreement on girls taking STEM fields at university in Japan. International Journal of Science Education, 41(16), 2254-2270.

Online Survey 2018  
Parents with college-educated daughters  
1236 ages 20-69  
618 males and 618 females

### Finding

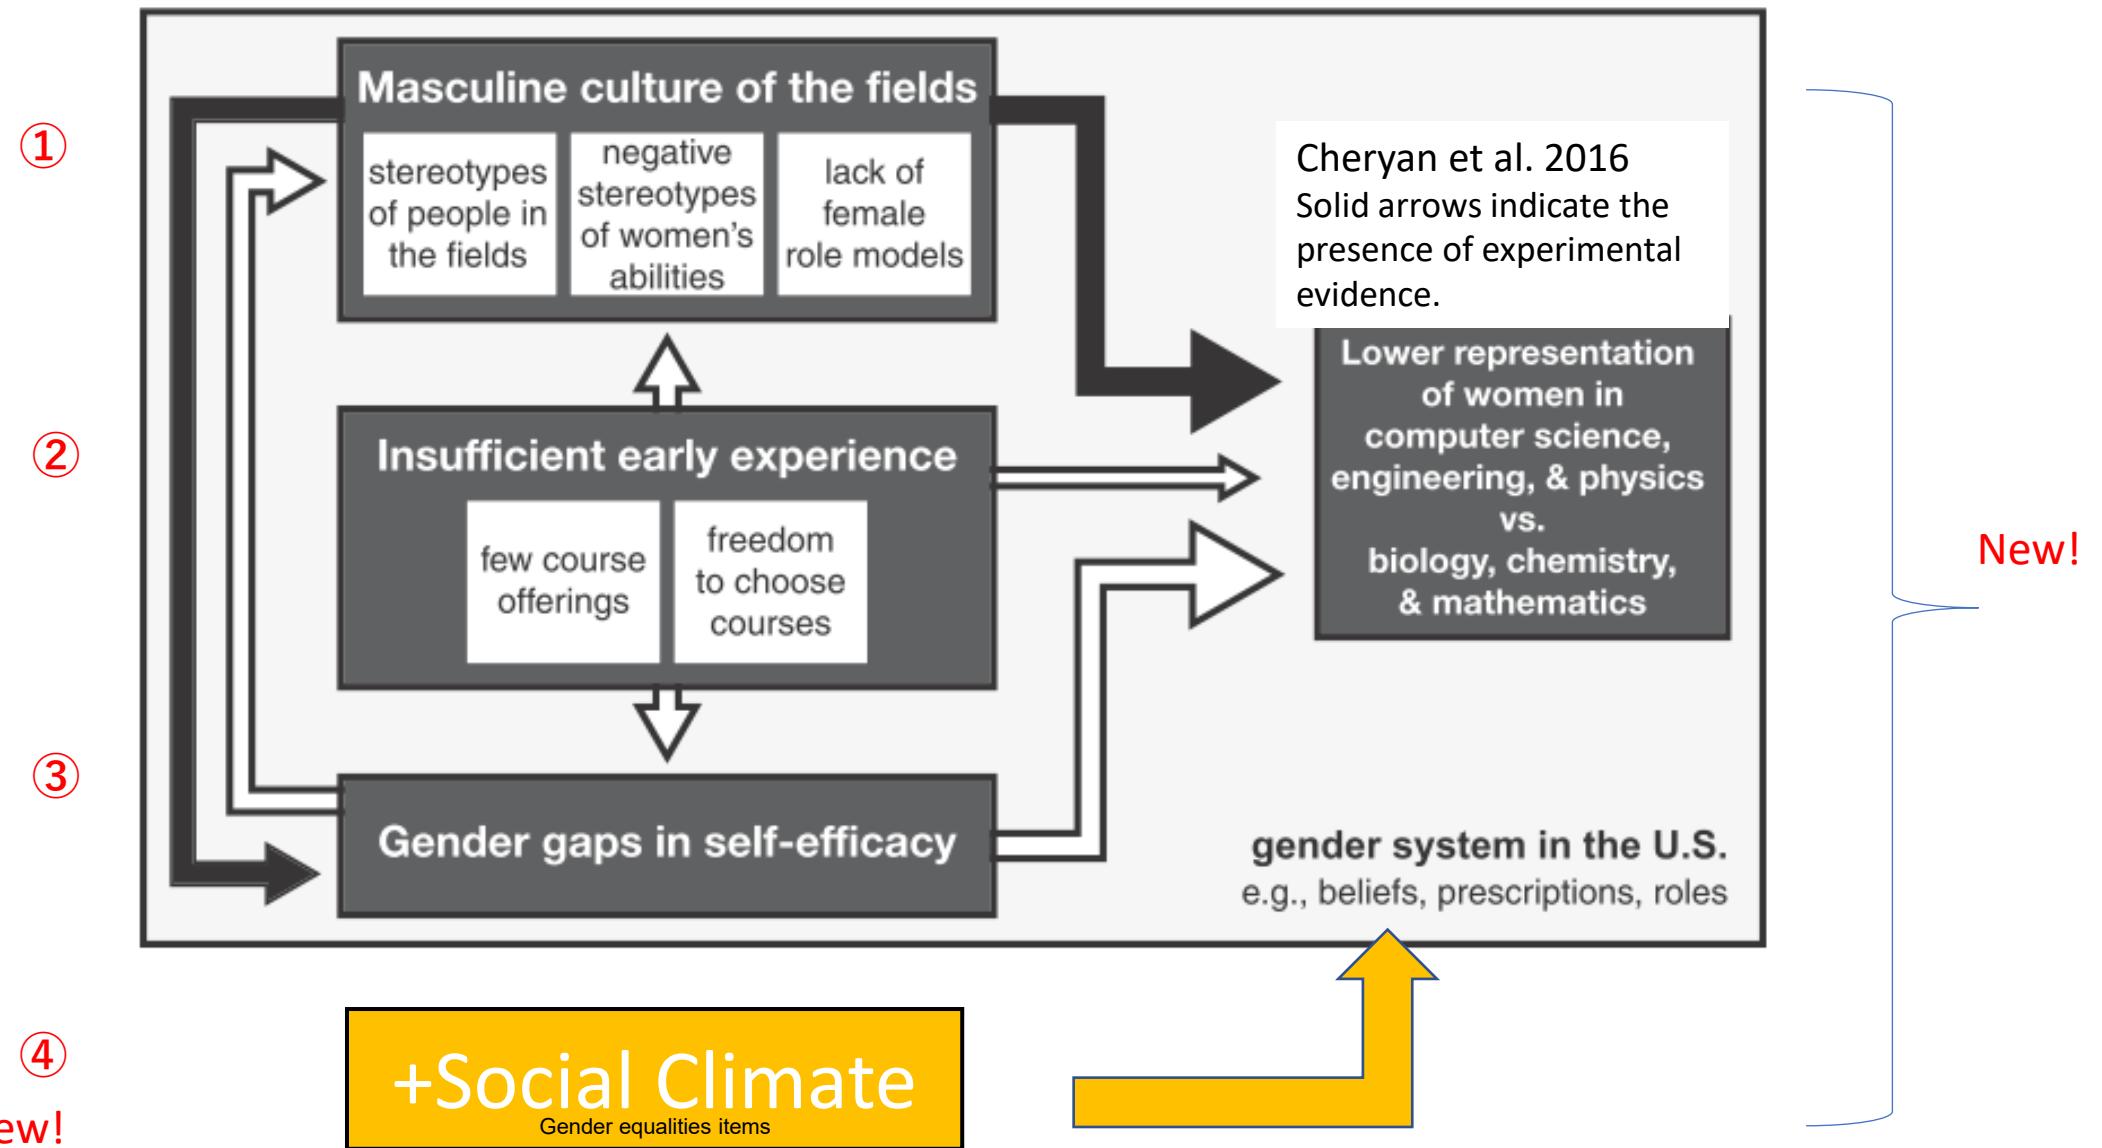

- Parents with inequality attitude disagree with girl's choice to study no only STEM filed but also any field.

井上敦 (2019) .親の数学のジェンダーステレオタイプと娘の自然科学専攻.日本科学教育学会第43回年会論文集,9-12.  
(Inoue, Atsushi (2019). Parents' Gender Stereotypes of Mathematics and Daughters' Natural Science Majors. Proceedings of the 43rd Annual Meeting of the Japanese Society for Science Education, 9-12.)

## 5. Social climate effect (社会風土効果)

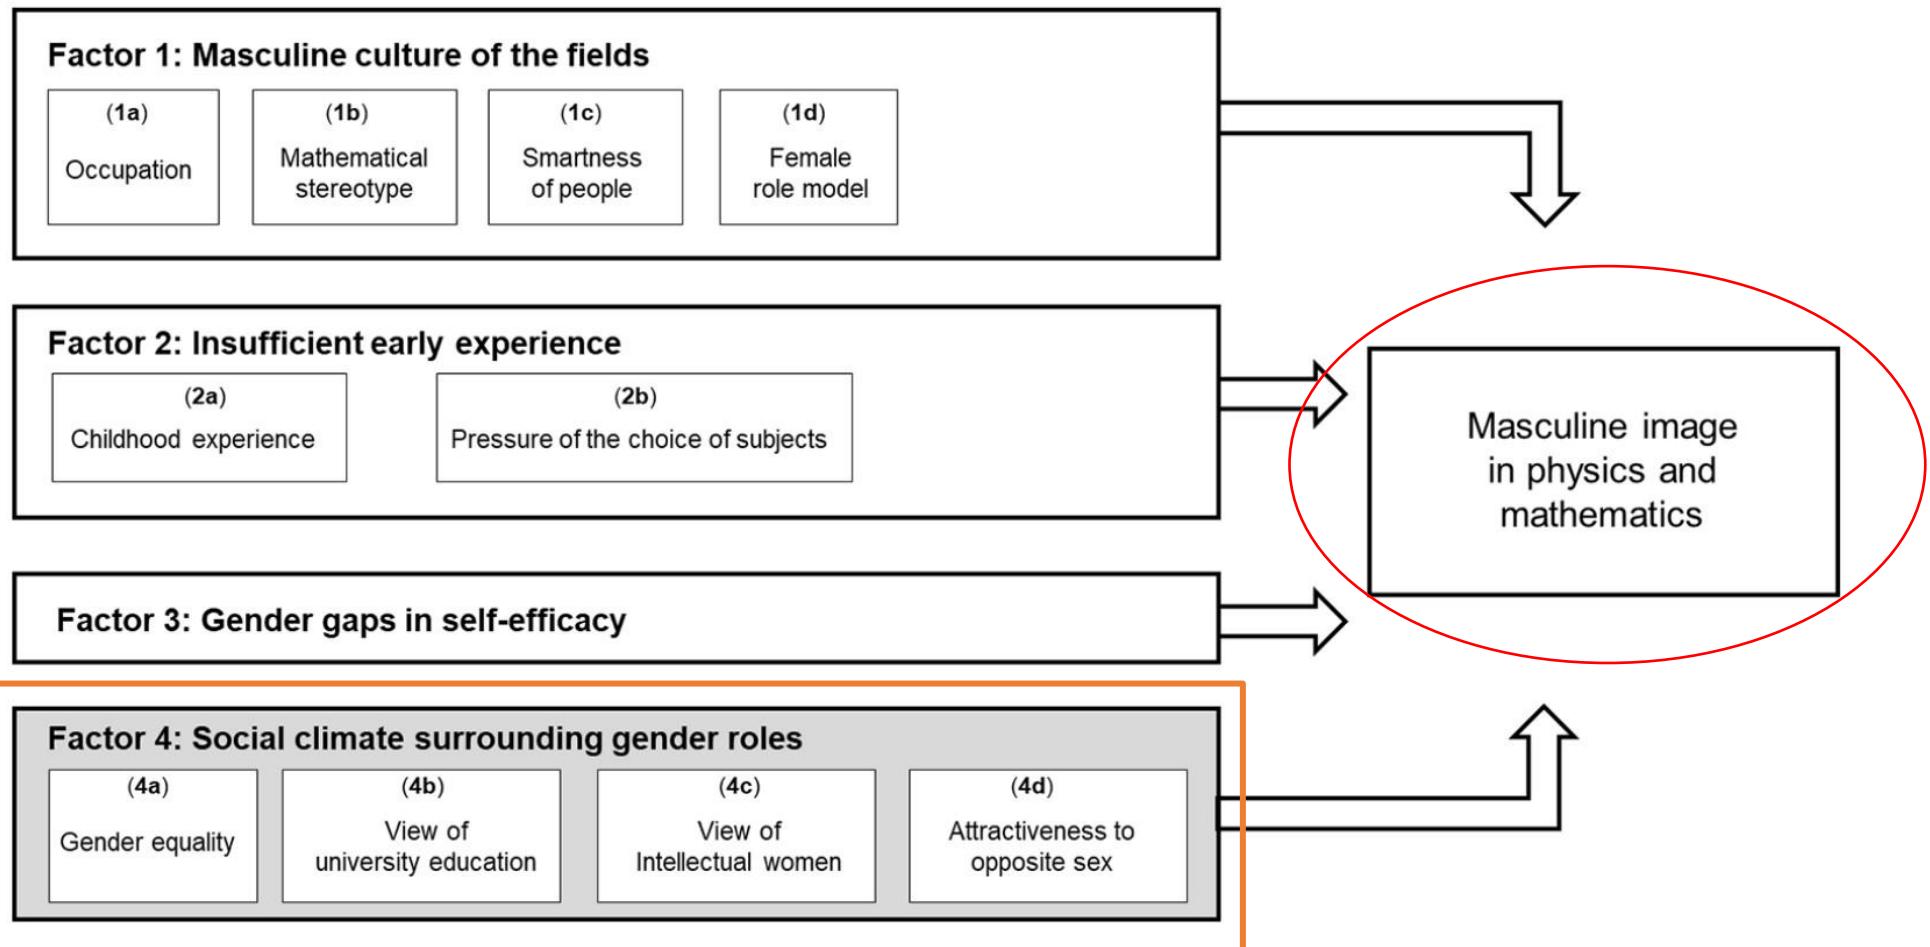

Ikkatai, Y., Inoue, A., Minamizaki, A., Kano, K., McKay, E., & Yokoyama, H. M. (2021). New model of the public image of masculinity in physics and mathematics tested in Japan and England. *Public understanding of science*

Online Survey, Males and Females aged 20-69

**Japan:** 1177 subjects Females 593, Males 594

**Not UK but England:** 1082 Females 553, Males 529

# Japan

**Table 2.** Factors affecting public perception of masculinity in physics and mathematics in Japan. Results from ordinal regression analysis.

Masculine Perception of Mathematics and Physics

## 6. Information provision (情報提供)

### (A) STEM Occupations

This passage outlined the plentiful career opportunities available to STEM majors. In particular, it detailed the involvement of graduates with backgrounds in mathematics and physics in the burgeoning field of AI. The passage also discussed the current scarcity of women in STEM majors despite high demand for graduates, and the hope that more women will choose to specialize in these fields in coming years.

### (B) Equal Society in Japan

This passage explained why economic independence is a vital component for women in achieving social equality and the freedom to live life as they wish. It highlighted some of the ways in which corporate environments are changing so that both women and men are able to lead fulfilling, sustainable careers.

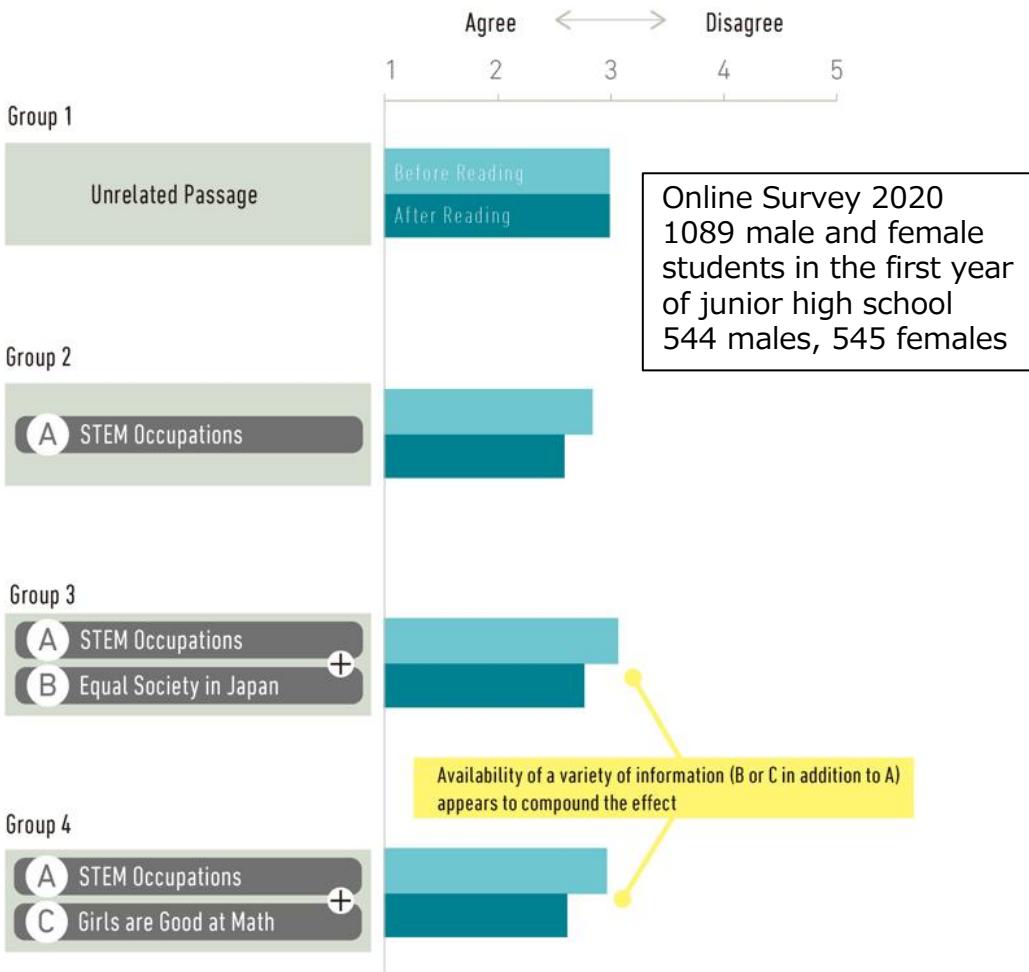

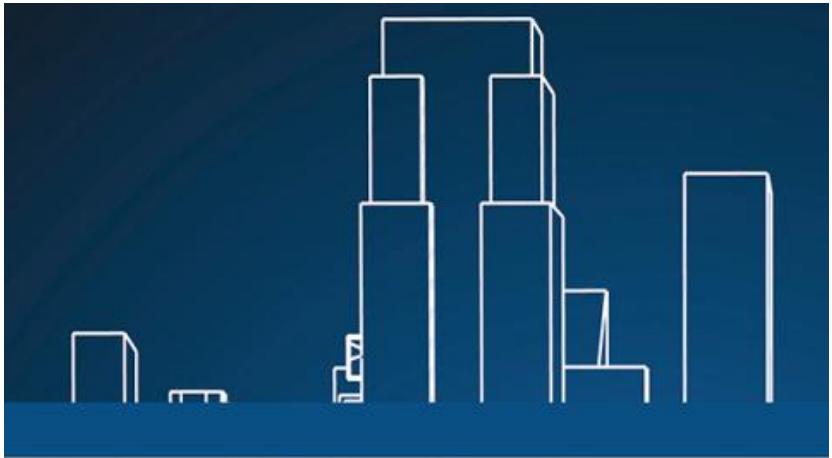

### (C) Girls are Good at Math

This passage demonstrated that there is no difference between women and men when it comes to mathematical aptitude. It shared the fact that girls in Japan score exceptionally well in mathematics, and that boys do similarly well. In fact, in international surveys, Japanese students, both boys and girls, have some of the best mathematics scores in the world.

Ikkatai, Y., Inoue, A., Minamizaki, A., Kano, K., McKay, E., & Yokoyama, H. M. (2021). Effect of providing gender equality information on students' motivations to choose STEM. *PLOS ONE*.

Q Would you like to major in a STEM field in university?

### REFORMING CAPITALISM, GOING DIGITAL AND GREEN

JAPAN'S APPROACH

Edited by

D. Hugh Whittaker and Yoshifumi Nakata

# Women's quota

- [Women in STEM] [Hiromi M. Yokoyama, Yuko Ikkatai, Euan McKay, Atsushi Inoue, Azusa Minamizaki & Kei Kano \(2024\) Can affirmative action overcome STEM gender inequality in Japan? Expectations and concerns, Asia Pacific Business Review, DOI: 10.1080/13602381.2024.2320547](#)
- Summary of our past papers and discussion on the women's quota
- Concerns that the quotas available to women only reinforce the incorrect stereotype that women can't do science

## 8. Comparative Advantage(比較優位説)

Using approximately 1 million test data from 3rd year junior high school students

1. Math, Science and Japanese:  
all scores  
girls > boys

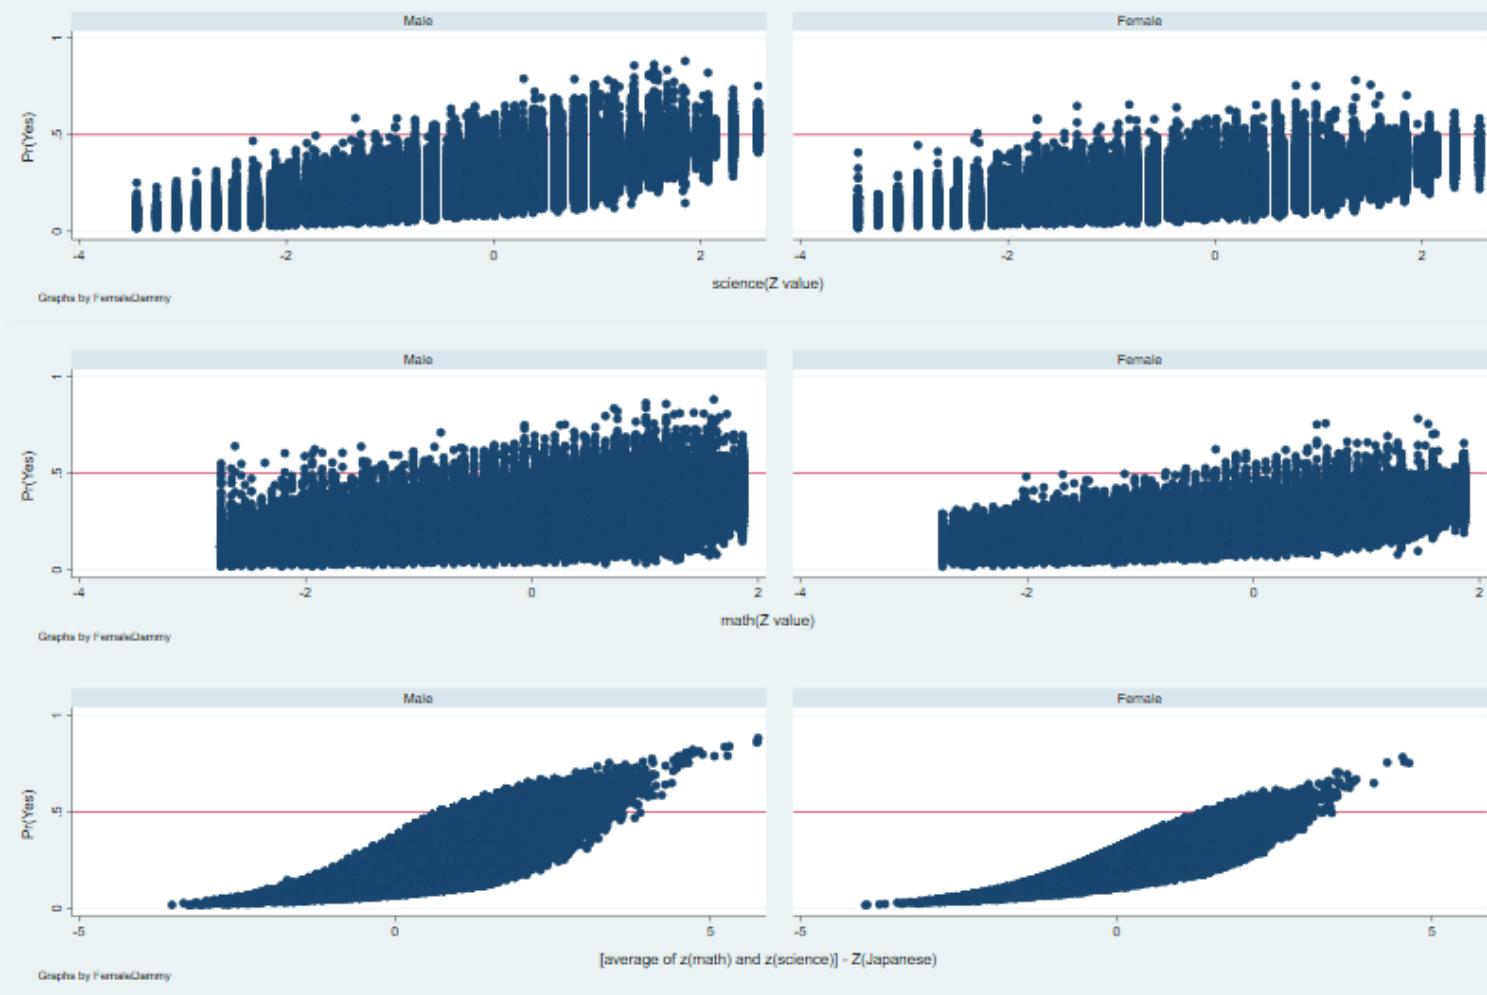

2.  $(\text{Math} + \text{Science}) - 2 \times \text{Japanese}$   
> boys are positive  
< girls are negative

Z-values in  
**Maths for Girls and  
Science for Boys Influence  
STEM Choice(Y)**

## The Comparative Advantage Thesis Revisited: Score in Maths for Girls and Science for Boys Influence STEM Choice Preliminary / submitted

Asuka TAKEUCHI , Ginko KAWANO , Mari MIURA , Hiromi M. YOKOYAMA .

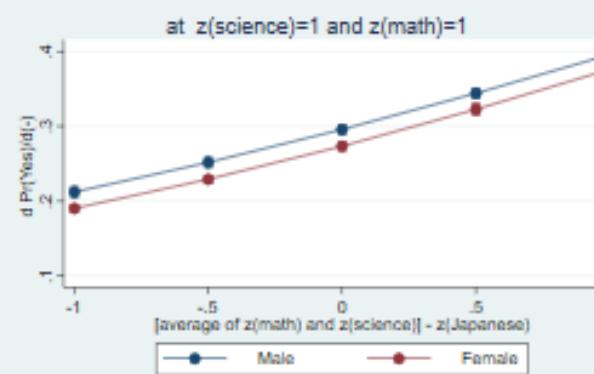

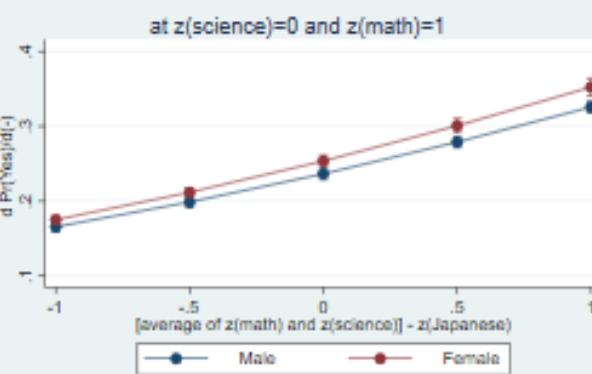

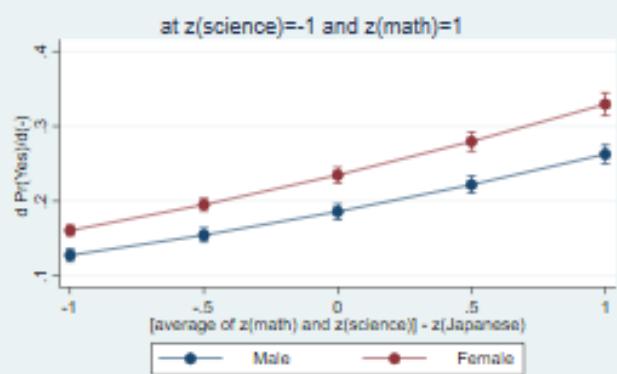

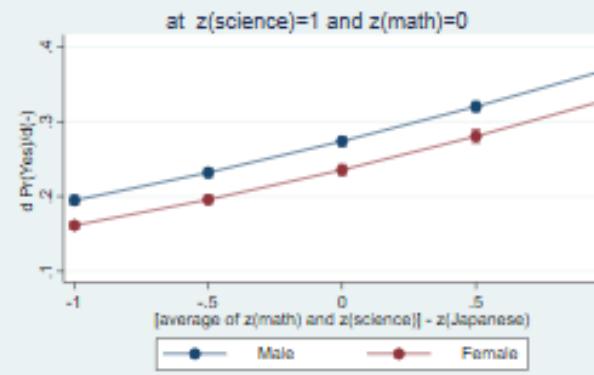

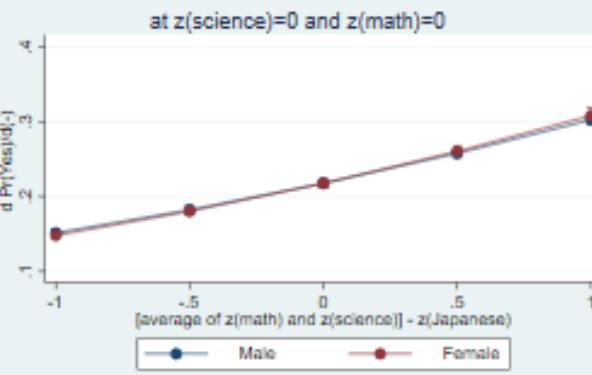

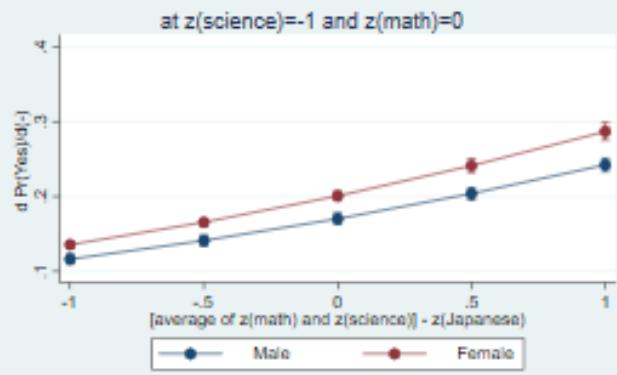

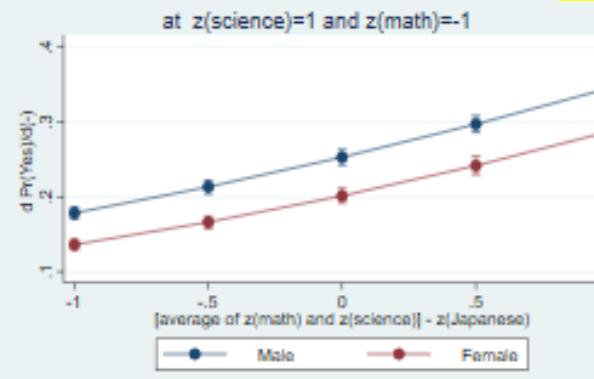

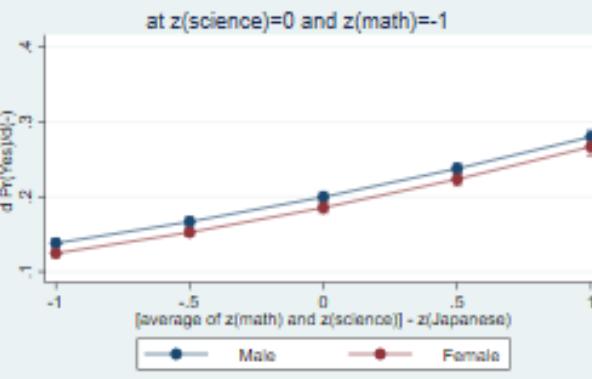

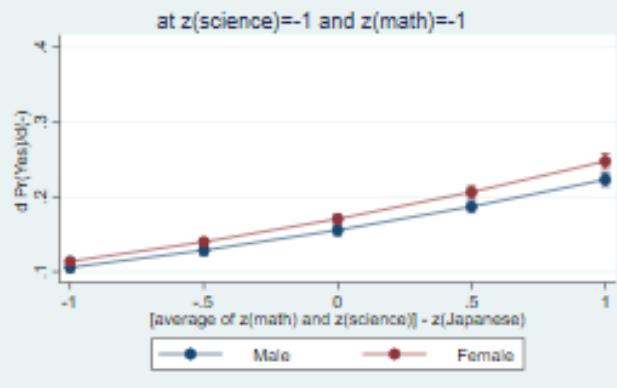

Q:a career related to science and technology in the future?

# a career related to science and technology in the future?

# Remaining Mysteries

## ② Is it true that girls hate science and math?

- Junior high school girls "pretend" their dislike of science and mathematics (Uchida & Mori 2012).

# Summary

To restore research competitiveness

- Most importantly, improving the environment

For female students to enter the sciences and technology

- Our study revealed that the social climate influences the masculine image of mathematics and physics.
- Providing information: equal information and denial of math stereotypes are important.
- It is important to encourage girls who like science to pursue STEM pathways. In fact, since we also want to see more boys in these fields, fostering an interest in science among boys is also a key policy issue.

Science of Science Communication

- As STS research field, we can research it for making evidence related “S&T Innovation policy” and “Science of Science Communication” .
